

ezlo atom

Next Generation Home Control

The Ezlo Atom is the newest addition to the Vera controller family, and is the smallest, most affordable control hub on the market. At a retail price of just \$29.95 and with a familiar form factor that makes it feel accessible to everyone, the Atom is an ideal way to introduce home automation to a broader range of people and help grow your business.

Packed with power, users will enjoy control of Z-Wave and Wi-Fi devices, including lights, thermostats, door locks, sensors, and more, all from a

single, intuitive mobile app currently deployed in homes all over the world. The app offers remote access and personalized notifications so your customers will be able to keep an eye on things from anywhere, and configurable scenes that add comfort and convenience to everyday life at home.

The Atom runs on our state-of-the-art MiOS cloud platform and features Z-Wave's latest S2 security, which ensures a user experience that combines speed, stability, and security.

Key Features

Plugs into any USB port with a consistent power source

Delivers speed and performance via distributed cloud architecture

Enables control of Z-Wave and Wi-Fi devices, including lights, thermostats, door locks, sensors & more

Support for voice control coming soon

Uses Z-Wave's cutting-edge S2 framework for enhanced security

Must be paired with the Vera mobile app

Specs

CPU

200MHz CPU SoC

Memory

Built-in 510kB

Z-Wave

Z-Wave Plus, S2 Security

Flash Memory

NAND 16MB

Certifications

FCC, CE, RoHS, Z-Wave Plus

Power Supply

5V 500mA USB Port

Wi-Fi

2.4 GHz 802.11 b/g/n

USB Port

Used for power only

Dimensions

10 x 29 x 51.5 mm (WxDxH)
